

Avant Media Manager[®]

Avant Media Manager is a versatile presentation management solution that supports **version control** and **enhances the security** of your proprietary content while providing your faculty with the flexibility and **concierge-level service** they deserve.

Avant Media Manager provides a single location for **up-to-date program content**, media files, and documents in a custom player on the user's hard drive.

"I can't tell you what a relief it is not to worry about having the most current content."

—Faculty Member

"Your support staff's efforts have been most helpful in bringing me up to speed with the Avant Media Manager product. I am happy to report that my first presentation went off perfectly and that I have already 'created' a second presentation."

—Faculty Member

"Can you please get into the other pharma companies I am working with? This is by far the best content management system I have used."

—Faculty Member

"Concierge service at its finest!"

—Client

Avant Media Manager also gives speakers flexibility in constructing presentations while **remaining consistent with all regulatory requirements**. Faculty are able to access approved content, construct custom slide decks from approved content, and manage and deliver their custom presentations directly from Avant Media Manager.
